

Part 1. Using the DOS Operating System

Chapter 1. Installation

- What's New about Setup for PC DOS 7
- Before You Begins
- Setup Command and its Options
- Other Installation Options
- Optional Tools Selection
- Installation Guidelines
- PC DOS Standard Installation

Chapter 2. Learning Basic DOS Concept

- Understanding
- Working with Files
- Understanding and Working with Directories
- Viewing Directory Contents
- Viewing Groups of Files Names in a Directory
- Making Directory
- Deleting Directory
- Copying Directory

Chapter 3. Using the Online Book Viewer

- Starting PC DOS Viewer
- Viewing the initial PC DOS Viewer Screen
- Moving Around in the PC DOS Viewer
- Exiting from the PC DOS Viewer
- Getting Other Types of Online Help
- Linking to More Topics
- Printing from the PC DOS Viewer
- Copying Topic Information into a File

Chapter 4. Configuring Your System

- Bypassing CONFIG.SYS and AUTOEXEC.BAT Command
- Specifying Startup Commands in Your CONFIG.SYS File
- Using Multiple Configurations
- Specifying Startup Commands in Your AUTOEXEC.BAT File

Chapter 5. Managing Disks

- Types of Disks

- Types of Diskette Drives
- Consideration for Formatting Disks
- Consideration for Labeling a Disk

Chapter 6. Partitioning Your Hard Disk

- Understanding Hard-Disk Partitions
- Using FDISK
- Formatting Your Hard Disk after Using FDISK

Chapter 7. Working with Batch Programs

- Understanding Batch Program Commands
- Making a Small Batch Program
- Testing a Batch Program
- Displaying Messages with a Batch Program
- Using the PAUSE Command
- Including Remarks in a Batch Program
- Running One Batch Program from Another
- Using Replaceable Parameters
- Controlling Program Flow

Chapter 8. Redirecting Input and Output

- Redirecting Command Input and Output
- Passing Information through Filter Command
- Controlling the Screen Display by Using the MORE Command
- Searching for Text by Using the FIND Command
- Sorting Text Files
- Combining Commands with Redirection Characters

Chapter 9. Using DOSKey and Editing Keys

- Using DOSKey to Work with Commands
- Using DOSKey to Work with Macros
- Using DOS Editing Keys

Chapter 10. Working with the Text Editor

- What's New about the E Editor for PC DOS 7
- Choosing a Text Editor
- Starting the E Editor
- Creating or Modifying a File
- Using Cursor Movement Keys to Move Around in the Text File

- Performing Basic Editing tasks
- Selecting Text
- Using Key Combinations to Manipulate Text
- Using E Editor Commands
- Customizing the E Editor
- Comparing a Text Editor and a Word Processing Program

Chapter 11. Connecting Computers

- Establishing the Connection between Computers
- Understanding What the InterLnk Program Does
- Including INTERLNK in Your CONFIG.SYS Files
- Running the InterLnk Program
- Redirecting Drives
- Excluding Drives from Redirection
- Breaking the Connection between Computers
- Removing Copying of INTERSVR.EXE and INTERLNK.EXE Files
- Reviewing Cable Specifications

Chapter 12. Using File Update

- Installing File Update at the Base Location
- Using File Update Menu Choices
- Transferring Updated Files to the Remote Location
- Troubleshooting

Chapter 13. Making More Memory Available

- Determining Your System's Memory Type
- Understanding How RAMBoost Works
- Using Advanced Features
- Using RAMBoost Tips and Techniques

Chapter 14. Speeding Up Your System

- Improving the Efficiency of Your Hard Disk
- Using DOS Defragmentation
- Using the BUFFERS Command
- Using SMARTDrive
- Using RAMDrive

Chapter 15. Using Central Point Undelete

- Installing Central Point Undelete for Windows

- Starting Undelete
- Deleted File Condition
- Delete Protection Methods
- Getting More File Information
- Sorting the File List
- Selecting Files
- Undeleting Files on a Network
- Undeleting Directories and Their Files
- Scanning the Disk for Lost Files and Deleted Data
- Showing Existing Files
- Advanced Undelete Methods
- Purging Deleted Files
- How the Delete Protection Method Affects File Recovery
- Central Point Data Monitor

Chapter 16. Using Central Point Scheduler

- Scheduling a Program
- Editing Existing Scheduled Events
- Deleting Scheduled Events
- Removing Scheduler from Memory

Chapter 17. Troubleshooting

- PC DOS Installation
- Memory Problems
- DOS Command Problems
- PC DOS Shell
- AntiVirus
- Stacker Compression
- Central Point Backup
- File Update Utility
- Other Common Problems

Part 2. Using the DOS Optional Tools

Chapter 18. Using the PC DOS Shell

- Installing the PC DOS Shell after Installing PC DOS
- Starting the PC DOS Shell
- Displaying Information About Your Files and Programs
- Introducing PC DOS Shell Basic
- Using PC DOS Shell Commands

- Getting Help
- Starting a Program
- Using the Task Swapper
- Leaving the PC DOS Shell
- Organizing Programs
- Working with Properties

Chapter 19. Using IBM AntiVirus/DOS

- Installing IBM AntiVirus/DOS after Installing PC DOS
- Starting IBM AntiVirus/DOS
- Protecting Your Computer Data against Viruses
- Checking for Viruses
- Customizing AntiVirus
- Cleaning Up When a Virus is Detected
- Running the AntiVirus Stand-Alone Program
- Systems that Use Resident Data Compression
- Systems that Use Security Software
- Troubleshooting IBM AntiVirus/DOS

Chapter 20. Using Central Point Backup

- Installing Central Point Backup after Installing PC DOS
- Configuring Central Point Backup
- Viewing the Main Central Point Backup Windows
- Changing the User Level
- Making a Backup
- Selecting Files
- Selecting Drives to Back Up
- Viewing Files
- Working with Setup Files
- Comparing Data
- Performing Network Backups
- Configuring Tape Drives
- Backup Strategies
- Using the CPBDIR Program

Chapter 21. Using Stacker Compression

- Installing Stacker after Installing PC DOS
- Before Using Stacker
- What's New about PC DOS's Stacker Compression

- Setting Up Stacker
- Monitoring Your Drives from DOS
- Using the Stacker Tools (DOS and Windows)
- Compressing Additional Drives
- Compressing Diskettes (or Other Removables)
- Working with Advanced Stacker
- Using Stacker Command
- Monitoring Your Drives from Windows
- Troubleshooting Stacker

Chapter 22. Using PenDOS

- Installing PenDOS after Installing PC DOS
- Starting PenDOS
- Using the Pen
- Using the Mouse as a Pen
- Using the PenDOS Menu
- Entering Characters
- Editing Characters
- Working with Applications
- Aligning the Tablet
- Recognition Tips
- Character Variations

Chapter 23. Using PCMCIA Support

- Installing Phoenix PCMCIA Support after Installing PC DOS
- Starting PCMCIA
- Setting Up PCMCIA (PCMDINST)
- Configuring Your PCMCIA System (PCMSETUP)
- Configuring PCMCIA
- Using Advanced Configuration
- Configuring PC Card after the Original Installation

Appendix A. More About Installation

- Choosing the Correct Installation Procedure
- Performing the LAN Server Administration Installation of PC DOS
- Installing PC DOS from a CD-ROM Drive
- Rerunning Setup
- Uninstalling and Restoring Your Previous Version of DOS
- Viewing and Editing the System Files during Install

- Viewing the README.TXT File
- Working with XDF-Formatted Diskettes
- Working with Setup Bundle Files
- Using the Emergency Startup Diskette
- Troubleshooting PC DOS Setup

Appendix B. Accessibility for Individuals with Disabilities
